PROFESSIONAL SUMMARY

AI-focused Computer Science graduate (2026) with hands-on experience building LLM-powered systems, ML models, and data pipelines. Engineered an AI Resume Shortlister using RAG and LangChain that cut screening effort by 60 and an Attrition Predictor achieving 93 accuracy. Seeking roles in AI/ML engineering or data analytics to deliver production-ready solutions.

EDUCATION

B.Tech in Computer Science June 2026
Anantha Lakshmi Institute of Technology & Sciences, JNTU Anantapur
CGPA: 6.5/10

TECHNICAL SKILLS

Languages: Python, SQL
AI/ML: Machine Learning ,CV, NLP, RAG (LangChain, LangGraph , Llama Index)
Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn , ,OpenCV , TensorFlow , Keras
Tools: Git, GitHub, Jupyter Notebook
Concepts: Data Analysis, EDA, Data Cleaning, Data Visualization,Statistical Analysis, SDLC

PROJECTS

AI Resume Shortlister (LLM + RAG System) GitHub

- Built an AI-powered resume screening platform using **Python, LangChain, RAG, FastAPI,** and **Streamlit** to automate candidate shortlisting.
- Implemented semantic resume-job matching using **Sentence Transformers, FAISS,** and automated PDF parsing to extract candidate information.
- Generated ATS compatibility scores, ranked candidates, and reduced manual resume screening effort by **60%**.

MediQ – Smart Hospital Appointment & Healthcare Management System Live

- Developed a full-stack hospital management system enabling doctor search, appointment booking, and healthcare record management.
- Built the application using **React.js, FastAPI, PostgreSQL, SQLAlchemy,** and **JWT Authentication** with secure role-based access.
- Designed scalable RESTful APIs and modular backend architecture to optimize appointment scheduling and hospital administration.

InsightAI – Full-Stack RAG Application GitHub

- Developed a full-stack **RAG AI Agent** enabling conversational interactions with uploaded PDF, TXT, and Markdown documents.
- Built the system using **FastAPI, LangChain, Groq (Llama-3.1), Hugging Face Embeddings, ChromaDB, SQLite, SQLAlchemy, React, Vite,** and **Tailwind CSS**.
- Implemented an Agentic **ReAct** workflow with document retrieval, semantic search, web search, Python tools, and persistent chat history for intelligent AI assistance.

CERTIFICATIONS

- Data Analysis & Decision Making – NPTEL
- Artificial Intelligence Fundamentals – IBM

ADDITIONAL INFORMATION

- Demonstrated ability to break down complex problems and design scalable AI-driven solutions
- Collaborative team player with strong adaptability Continues and quick learning ability
