SHAIK QAHNIYA ANJUM

Aspiring Python Full Stack Developer

Bengaluru, India | +91 9491833093 | Mail | LinkedIn |

Professional Summary

B.Tech Computer Science graduate (2026) with a strong foundation in Python Full Stack Development and hands-on experience building scalable web applications using Python, FastAPI, SQLAlchemy, PostgreSQL, HTML, CSS, and JavaScript. Experienced in developing RESTful APIs, implementing authentication and authorization, designing relational databases, and building responsive, database-driven applications following Software Development Life Cycle (SDLC) and Object-Oriented Programming (OOP) principles. Passionate about backend development, clean code practices, and delivering reliable, maintainable software solutions. Eager to contribute as an entry-level Python Full Stack Developer in a growth-oriented organization.

Technical Skills

Programming Languages: Python, SQL, JavaScript

Web Technologies: HTML5, CSS

Frameworks & Libraries: FastAPI, SQLAlchemy, Pandas, NumPy, Matplotlib

Databases: MySQL, PostgreSQL

Core Computer Science: Object-Oriented Programming (OOP), DBMS, SDLC, DSA(Fundamentals)

Developer Tools: Git, GitHub,

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Time Management

Academic Projects

MediQ – Smart Hospital Appointment & Healthcare Management System Live

- Developed a full-stack healthcare platform enabling doctor search, online appointment booking, and patient management.
- Implemented JWT authentication, appointment scheduling, doctor management, patient registration, and admin modules.
- Built a scalable FastAPI backend with PostgreSQL and SQLAlchemy for managing hospitals, doctors, appointments, and healthcare records.
- Engineered a modular architecture following SDLC best practices, improving scalability, maintainability, and user experience.

Text Authenticity Verification System Using Machine Learning Techniques

- Built an ML-based system to verify textual authenticity and detect fake or manipulated content, covering the full pipeline from data preprocessing to model evaluation.
- Applied NLP techniques (tokenization, feature extraction) and trained multiple classification models to distinguish genuine from non-genuine text.
- Compared model performance across algorithms to select the most accurate and efficient approach for real-world text inputs.
- Strengthened practical skills in Python, NLP, supervised learning, and model evaluation methodology.

Education

B.Tech in Computer Science and Engineering 2026
Anantha Lakshmi Institute of Technology and Sciences Aggregate: 76%

Intermediate (MPC) 2022
Narayana Junior College Percentage: 65%

Secondary School (Class X) 2020
Prasad Talent School Percentage: 83%

CERTIFICATIONS

Data Analysis & Decision Making (NPTEL) Artificial Intelligence Fundamentals (IBM) Python Full Stack (EduSkills)

ADDITIONAL INFORMATION

- Strong analytical, problem-solving, and software engineering skills with experience developing AI-driven and full-stack applications.
- Collaborative team player with excellent adaptability, continuous learning mindset, and interest Developing Real World Problem SOlving WEB APPLICATIONS
